Experience

Oct 2019– Feb 2020

MobileWash *Project Manager*
- Monitored four offshore teams' progress through daily standups, one-on-ones, and through Jira
- Coordinated nine developers across web and mobile development in an agile environment
- Assisted the Project Owner with day-to-day tasks. Provided key notes for meetings and collaborated on key features for weekly/bi-weekly sprints

May 2019– Aug 2019

Lambda *Team Lead*
- Led daily standups with full team, and one-on-ones with developers
- Provided guidance for weekly deadlines, assisted in front-end, back-end, documentation, and code reviews
- Oversaw and motivated teams of up to 8 people across web, data science, and UX designers

Dec 2017– Feb 2019

Ultimate Drafting Services *Project Coordinator*
- Collaborated with construction manager and city department officials to resolve queries for construction progress and to ensure compliance with all safety procedures at site
- Developed and maintained accurate and complete files for projects while monitoring for integrity and completeness
- Coordinated meetings with city departments, serving as primary liaison

Aug 2016– Oct 2017

SQAsquared *QA Analyst*
- Designed test cases for automation and manual testing; performed various types of testing, including regression and functional. Reported bugs using TFS
- Attended daily standups, working with various teams with on-off site members to accomplish our sprints within time

Jan 2014– July 2016

Allstaff *Web Developer*
- Acquired skills in web development using Wordpress with HTML/CSS JS jQuery to develop and maintain sites

Projects

Sauti Bank
http://production-sauti-databank.netlify.com
Reactjs, Nivo, Sass, Postgressql, Knex

The issue was technical debt—this nonprofit needed a better way to represent and visualize the data being collected, enhancing the value of their existing assets.

Tenatly
https://tenantly.netlify.app
Reactjs, Knex, Postgressql, Stripe, Material UI

Two portals, for Tenant and Admin. Admin can add properties, edit, delete, collect payments, manage documents, and view work orders. Tenants can view leases, pay rent, and request work orders.

Skills

Programming Languages: HTML, CSS, Javascript, SQL, Python
Frameworks/Libraries: Reactjs, Express, Nodejs, Redux, WordPress, Typescript
Tools/Software/Deployment: Git, Restful API, Netlify, Heroku, Postman, Jira, Team Foundation Server
